

Colorado's first member of the  
NAHAD Hose Safety Institute  
since 2012

## THE PROBLEM

Hose failures from misapplication, low quality components or improper assembly.

Hose is an important component for so many industries. Hose failures can cause:

- Employee injuries
- Equipment and plant downtime
- Environmental impact
- Reorder or rework expenses
- Audits and investigations

## THE SOLUTION

The safety, reliability and consistency of following the NAHAD  
Hose Safety Institute guidelines.

The National Association of Hose and Accessories Distributors (NAHAD) developed the Hose Safety Institute. As a Hose Safety Institute member, Munro Supply has access to best practices produced by the best minds in the industry. We're committed to training and testing our sales and production team because we are laser focused on safety, reliability and consistency.

Safe Hose Assemblies Protect Your Workforce, Product, Reputation and Profitability

- Workforce – fewer accidents, reduce lost employee time
- Product – avoid unplanned downtime, inconsistent machinery performance or poor product perception
- Reputation – safety issues could bring lawsuits, OSHA fines and environmental issues
- Profitability – any waste cuts into profitability and unsafe workplace, machinery, or equipment creates inefficiency and waste

Don't take chances! Ask if your  
hose distributor is a member of  
the NAHAD Hose Safety Institute.
